COYOTE CREEK at ROCK SPRINGS, SECTION 205
SANTA CLARA COUNTY, CALIFORNIA

CONGRESSIONAL DISTRICT: 16th District, Rep. Zoe Lofgren

PROJECT DESCRIPTION: The study area is located along Coyote Creek, in the Rock Springs area of San Jose, California. Local Sponsor is Santa Clara Valley Water District (SCVWD).

FISCAL YEAR 03 BUDGET: \$0

POSSIBLE SOLUTIONS: Two alternatives have been identified to solve the flooding problems in the area of Rock Springs. One alternative is to construct levees and floodwalls along the creek bank. The second alternative is to construct a setback levee and floodwall.

PRESENT STATUS: The Feasibility Cost Sharing Agreement (FCSA) was signed 31 January 2000 and the Feasibility Study initiated on 3 April 2000. Two public workshops were held on 29 June 2000 in the study area. The City of San Jose finally issued rights of entry in December 2001, which delayed by approximately one year the on-site work required for the next milestone conference. The “without-project” milestone conference will be held on 30 April, 2003.

FUTURE EFFORTS: The Feasibility Study is scheduled for completion in September 02.
